PayPal Cross-Border Consumer Research 2015

GLOBAL SNAPSHOT
PayPal Cross Border contacts: Melissa O’Malley, Astrid Huijssoon, Ritesh Arora
PayPal Market Research Contact: Daniel Jenkinson
Ipsos Contacts: Eleanor Pettit & Peter Attwell
Background & Objectives

Advancement of technology is helping to open up commerce opportunities for everyone - across borders, anywhere, anytime and via any device.

Understanding that we are going through a commerce revolution, PayPal in partnership with Ipsos, conducted a global market survey with approximately 23,000 consumers to examine how people shop online and across borders.

This survey is designed to gain insight into 3 main areas:
• How online commerce, and specifically cross-border commerce is evolving
• How and why consumers shop online across borders
• How consumers pay for cross-border transactions
Research Methodology
This study was conducted across 29 markets and approx. 23,000 consumers globally.

Fieldwork
- Online survey
  - Global Fieldwork conducted Sept-Oct 2015
  - 20 minute questionnaire

Questionnaire
- Screening
- Transaction & Spend: Past 12 Months & Next 12 Months
- Cross-Border transactions & spend
- Drivers, barriers and attitudes to cross-border shopping
- Cross-Border Payment

Sample, per market
- 29 markets
  - Sample of c.800 per market.
  - Nationally representative of online population
  - Aged 18+
  - Respondents recruited from online panels

Own and/or use an Internet-enabled device*

Data weighted to adjust for known population incidence

*Desktop computer/Laptop/notebook computer/Tablet/Smartphone/Some other type of mobile phone/Electronic organizer/PDA with wireless voice and data features/Games console with Internet connectivity (e.g. Wii)/Smart TV
GLOBAL SNAPSHOT
Incidence of online cross-border shopping

Shopping across-borders is most prevalent in Ireland, Austria and Israel

Self-stated domestic and cross border purchasing in past 12 months

- % Shop domestically only
- % Shop domestic and x-border
- % Shop x-border only

Ppt. change in x-border incidence from 2014 (where data available):

Q27. Thinking about shopping online, from which of the following country or geographies’ websites have you purchased in the past 12 months? Please include your home country if applicable. Base: Online shoppers (size shown in appendix)
The majority of cross border purchases are still made on a computer

But in some less developed markets, a large proportion of cross-border purchases are made on a mobile device

### Average proportion of x-border purchases in past 12 month made on each device

- **Africa**: NG, SA, EG

Q28. In the past 12 months what kinds of products have you purchased from websites in other countries? Base: Cross-Border shoppers n = 8097
Attitudes to cross border shopping vary dramatically between markets

Attitudes among all online shoppers surveyed*

(% Agree with statement)

- I prefer large 'global' stores (e.g. Amazon) when purchasing from another country
- It does not matter to me where the items are shipped from, as long as the total price is good
- I would not feel comfortable making purchases from a foreign website that is not in my own language
- It is not important to me if the online retailer is based overseas or not
- I am generally comfortable buying from an online store in another country
- I trust online stores from other countries as much as stores from the country I live in
- Sometimes it is not clear whether I am shopping on a domestic or international online store
- I have in the past made purchases on websites not in my own language

Attitudes compared between countries

(% Agree with statement)

- I would not feel comfortable making purchases from a foreign website that is not in my own language
- I prefer large 'global' stores (e.g. Amazon) when purchasing from another country
- It is not important to me if the online retailer is based overseas or not
- I trust online stores from other countries as much as stores from the country I live in

*Results are among all consumers surveyed, not weighted for population size

Q39. Which, if any, of the following would make you more likely to buy from a website from another country? Base: Online shoppers n = 16,302
Q36. Which, if any, of the following reasons prevent you purchasing from websites in another country (more often)? Base: Online shoppers = 16,302
The number of people sending returns cross-border is low in most countries
Freight forwarding is most popular in China, India and UAE

* Freight forwarding defined as having products delivered to a freight forwarding company (who receives goods in the country of purchases then ships them to you) or having products delivered to a friend’s/family member’s/hotel’s address in the country of purchase

Q42. Have you ever done any of the following when buying products online from other countries?
Q40. Which of the following (if any) have happened to you in the Past 12 months? – returned a product to another country. Base = cross-border shoppers (size shown in appendix)
Attitudes to currency conversion

Attitudes among all online shoppers surveyed* (% Agree with statement)

- I would prefer to have the option of paying either in local currency or my own currency: 73%
- I check currency conversion rates before making purchases in foreign currencies: 62%
- I would not feel comfortable making purchases online in a foreign currency: 45%
- My bank charges me for making payments in foreign currencies: 45%
- I have in the past made purchases online paid in a foreign currency: 44%
- The fees charged by PayPal for x-border transactions are generally lower than other payment methods: 33%
- PayPal charges me for making payments in foreign currencies: 29%

Attitudes compared between countries (% Agree with statement)

- I would not feel comfortable making purchases online in a foreign currency
- The fees charged by PayPal for x-border transactions are generally lower than other payment methods
- I would prefer to have the option of paying either in local currency or my own currency

*Results are among all consumers surveyed, not weighted for population size.

Q44c. For what reasons is this your preferred payment method for online transactions/purchases from websites from another country?)
Base: Cross Border Shoppers who give preference (n = 7839)
Incidence of P2P payments

Incidence of Cross-border P2P Payments
(% respondents have “Sent money to friends and/or family in another country” in the past 12 months)

Q48. Which of the following have you done online in the past 12 months?
Base = all internet users (size shown in appendix)
Market Sizing Estimate and Forecast: Methodology
Estimating and forecasting online and mobile sales for the period 2014 to 2017

**INPUTS**
To build the forecast we look at relationships between key macro-economic indicators.
- Total and online population development (Source: The World Bank).
- GDP per capita development (Source: The World Bank).
- Total and online retail sales (Source: ONS Report).

**SURVEY DATA**
We use the survey data to add purchase behaviour (penetration and average spend per head) to understand the size and projection of future category spend:
- Category online purchase penetration
- Average category spend
- Smartphone penetration
- Tablet penetration

**MODELING**
From these inputs, we model category sales growth, changes to the online/mobile population, and growth in online/mobile spend for those populations to forecast total online and mobile spending. We assume that the current rates of adoption amongst non-users continues and as the level of adoption reaches the upper limits we reach saturation.

- Total online spend includes mobile spend. Mobile spend includes spend on both smartphones and tablets.
- Estimations/forecast based on the following meta categories: Groceries, Food, drink & Alcohol; Health & Beauty; Clothing, Footwear & Accessories; Event tickets; Travel & transportation; Household goods; Leisure, Hobbies & Outdoors; Baby/Children’s Supplies; Entertainment; and Consumer Electronics.
On behalf of PayPal, Ipsos interviewed a representative quota sample** of c.800 (23,354 in total) adults (aged 18 or over) who own and/or use an internet enabled device* in each of 29 countries (UK, Ireland, France, Germany, Austria, Switzerland, Italy, Spain, Netherlands, Sweden, Poland, Turkey, Russia, Israel, UAE, USA, Canada, Brazil, Mexico, Argentina, India, China, Japan, South Korea, Singapore, Australia, South Africa, Nigeria, Egypt). Interviews were conducted online between 17th September and 28th October 2015.

Data was weighted to known incidence of online shoppers in all countries, and to demographic profile of internet users in 4 countries (SK, SG, EG & UAE).

*Desktop computer/Laptop/ notebook computer/Tablet/Smartphone/Some other type of mobile phone/Electronic organizer/PDA with wireless voice and data features/Games console with Internet connectivity (e.g. Wii).

**Age, gender and region representative of online population (Age and gender representative in Switzerland). Quotas were not set for Nigeria, as online profile not available in this country. Ipsos is a member of the MRS, and research was carried out according to MRS code of conduct.
