PayPal Case Study:
San Ramon Valley Unified School District
PAYPAL CASE STUDY: San Ramon Valley Unified School District

San Ramon Valley Unified School District (SRVUSD K-12) encompasses the communities of Alamo, Blackhawk, Danville, Diablo, and San Ramon, as well as a small portion of the cities of Walnut Creek and Pleasanton. The district is comprised of 35 schools serving more than 32,000 students in California.

School registration every August was cumbersome and chaotic—it was frustrating for parents, volunteers, and school staff alike. To make the process easier for all, Tassajara Hills Elementary School and Diablo Vista Middle School partnered with PayPal to bring their entire back-to-school registration process online with the PayPal for Schools platform.

The solution allowed them to set up a storefront for each school to manage their registration process, securely collect payments, and accept donations year round.
Parents, administrators, and volunteers prefer a simple-to-use online system to a paper system.

The solution accommodates the needs of parent/teacher organizations, schools, and educational foundations—simplifying processes for all.

It’s an exceptional value at a very low cost.

The registration process is enormously simplified because payments can be collected ahead of time through the online system, providing a clear electronic record of all payments made.

Donating year-round is easy and convenient.

Why the PayPal School Store works for SRVUSD
I recommend PayPal to others. Collecting funds and information for schools and the various entities around it is complicated... PayPal is helping us get there.

—Tom Glynn, Parent Volunteer at Tassajara Hills Elementary School and Diablo Vista Middle School
PayPal Case Study:
Moreland School District
PAYPAL CASE STUDY: Moreland School District

Moreland School District (K-8) is comprised of seven schools in San Jose, CA, all of which have been designated as California Distinguished Schools. The district is committed to empowering all students through innovative and exemplary educational practices.

Moreland began using the PayPal School Store by popular demand: Parents asked for it. Before they launched the Store, they were limited in the ways and types of payments they could accept. (Payments would either be dropped into steel deposit boxes at each school or handed directly to a staff member.)

This solution provides parents with greater flexibility by giving them more ways to pay, along with the convenience of paying online anytime, anywhere. And it works wonders for the district too because they don’t have to receive, store, or deposit the hundreds of checks they receive because it can all be done online through the Store.
Those with preschoolers and kids in extended-care programs have the flexibility to pay when and how they want.

They can pay for preschool or aftercare, and make tuition payments quickly and easily.

Lower likelihood of late fees because parents don’t have to pay in-person, they can pay from anywhere—home, work, or directly from their mobile device.

Parents love this solution

They’re notified immediately when a payment is made—which makes bookkeeping easy.

Looking up information is quick and easy—like which students are registered for which activities, and what payments have been made.

Collecting payments is easier, too—no more manual recording of payments, which saves a lot of time.

Moreland’s staff loves it, too
“\[I\] wish we could convert all parents into using the PayPal feature. Working with PayPal is great!\"  

–Debbi Lyon, Business Services, Moreland School
