Here's what happens when a customer named Dave pays for ice cream.

1. Dave orders a double scoop and is ready to pay.

2. The ice cream shop has a POS solution to process Dave's payment.

3. Dave's total appears on the PayPal Chip Card Reader.

4. Dave swipes, inserts, or taps to complete his payment.

5. The payment goes through! And Dave is in cherry vanilla heaven.

6. A "Send receipt" message appears on the POS screen.

That's Dave!

Behind the scenes...
PayPal optimizes the payment experience, letting the shop securely accept most forms of payment—even contactless payments like Apple Pay® and Android Pay™.

Total: $3.40

And that's it. Processing POS payments with PayPal in your business can be that easy, too.

Apple Pay is a trademark of Apple Inc., registered in the U.S. and other countries. Android Pay is a trademark of Google Inc., registered in the U.S. and other countries.
