Offer Payout Optionality

When regulations or customer preferences don't allow for airline vouchers, trust PayPal's payout capabilities to provide you with payment optionality, including direct bank deposits, PayPal, Venmo, and eGift cards. Hyperwallet transfers funds using local bank accounts whenever possible to speed-up delivery times, reduce the need for costly wires, and help avoid complicated reconciliation issues.

Navigate Regulatory Concerns

Hyperwallet's tokenization technology stores debit card and banking information off-site in secure data centers to mitigate

concerns around the security of sensitive payment data and traveler information. In-depth payout tracking and reporting helps to further reduce the administrative hassle associated with voucher inventory management.

Integrate With Ease

Hyperwallet's technology makes it easy to integrate full stack payment issuance capabilities directly into an existing airline compensation platform using our REST API. Need to solve for compensation payment pains fast? Accelerate your launch schedule with Hyperwallet's white-label Pay Portal Payout Experience.
