In order to make use of this functionality, users will need: (i) a PayPal account in good standing; and (ii) the most up to date PayPal App on their device. Limits, terms and conditions apply (see PayPal's User Agreement for details). For buyers, making a payment via PayPal QR code works like sending money through the PayPal App. It's free for buyers when they select "Goods & Services" and make a payment to a PayPal Hong Kong account in HKD. Fees may apply when converting currency and when sending money to an account in another country.
